■ **Network Health Systems** - NHS Info's helpful surveys, reports and health tips make it possible for ACG members to assess their health online via a Health and Lifestyle Assessment.

It covers numerous health aspects including personal and family health history, exercise, nutrition, driving habits, stress, workplace safety, regular examinations and preventative measures.

From the answers given, you will receive an assessment of what your risks are when compared to the average person in your age, sex, and race group. (No one else sees your answers or the report.) By seeing where your risks are greater than the norm, YOU can make the determination of what areas of your health you can improve.
